

The Romanian Journal of Information Science and Technology (ROMJIST) seeks high quality papers for a **special issue on:**

Information Science and Technology in Crises

Any of the following topics are appropriate:

- Big Data and Machine Learning in crises mitigation
- AI in epidemics (especially respiratory epidemics)
- AI, ML and computers in crises management
- Decision support systems for epidemics management
- Internet and social networks monitoring under crises
- Graph theory applications to problems related to epidemics
- Medical informatics for epidemics
- Electronic equipment and devices for combating consequences of the epidemics

Other topics relevant to crises situations, especially epidemics, are acceptable.

The special issue will be published as an electronic-only issue. Papers will undergo a **fast-track reviewing**. Papers written in poor English and papers not enough relevant will be rejected without further reviewing.

The firm deadline is May 5, 2020.

Submission. Please send papers in the journal template **to the ROMJIST office** (romjist@nano-link.net) and **simultaneously to the Guest Editor** (at hteodor@etti.tuiasi.ro).
